

How many can you spot?..

Some of the birds breeding on the Beacon:

- robin
- blackbird
- song thrush
- wren
- blue tit
- great tit
- long-tailed tit
- chaffinch
- bullfinch
- greenfinch
- jackdaw
- magpie
- carrion crow
- wood pigeon
- collared dove
- chiffchaff
- blackcap
- garden warbler
- willow warbler
- meadow pipit

Summertime

when the living ain't easy if you've got hungry chicks to feed!

Tune in to the Beacon's birds!

If you hear a worried parent maybe you are causing them problems. It's tough being a parent so please move quietly away. Remember they've already got lots of predators (like sparrowhawks, magpies, and squirrels) keen to eat their chicks. And them too if they get the chance! And you thought being a human parent was hard work?

Meanwhile summertime is good for butterflies on the Beacon and many other insects like grasshoppers. The best place to see butterflies and flowers is the picnic field. In the evening you'll see bats hunting moths.

Can you... find the **caterpillar** on the **Summer (Hav) Bench?**
